## EDUCATION

### Memorial University

St. John's, NL

*Bachelor of Engineering in Computer Engineering (3rd year)*

*Sep. 2021 – May 2026*

- **Interest:** Robotics, Control Systems, Machine Learning, Data-protection/Cyber-security
- **Honors & Awards:** Wilfred & Rose Davis Scholarship, 2021

## EXPERIENCE

### Associate Implementation Consultant Intern | Co-op

Jan 2026 – Present

*Orion Health*

- Automated Excel reporting workflows using Python ETL scripts, reducing manual processing time by **80%+** across recurring operational reports.
- Optimized **10+** MySQL database views for the Health811 Clinical Portal, improving data accuracy and client-specific reporting consistency.
- Configured and validated enterprise healthcare portal components through AWS-hosted, PHIPA/PIPEDA-compliant environments, resolving Jira-tracked production issues and supporting secure client deployments.

### Software Developer | Co-op

May 2024 – Jan 2025

*Jeddah International School*

*Jeddah, Saudi Arabia*

- Collaborated to deploy a dashboard web application used to generate **50+** reports and analyses on student and teacher performance data, improving administrative efficiency by **25%**
- Debugged and resolved **30+** hardware and software incidents in network server environments, fixing **10+** security vulnerabilities and reducing overall system downtime by **15%**

### Product Manager | Co-op

Sep. 2023 – Jan. 2024

*NL Eats*

*St. John's, NL*

- Collaborated and led a team to develop the NL Eats Hydroponic mobile app using **MongoDB**, and **Javascript**
- Designed and launched **2** dynamic websites, using **Figma** and **JavaScript**, to raise awareness about food insecurity by **20%**
- Conducted analysis on streamline connection between hydroponic systems and servers, improving latency by **30%**

## PROJECTS

**Portfolio Website** | *Javascript, MongoDB, Python*  
[neillouis3-portfolio.vercel.app](https://neillouis3-portfolio.vercel.app)

Sep. 2023 – Dec. 2023

- Developed a personal portfolio website using **Javascript** and **Next.js**, showcasing projects and skills with a responsive and modern UI/UX design
- Built a lightweight backend with **MongoDB** to manage dynamic project content, enabling streamlined updates and scalability

**Archived** | *TypeScript, MongoDB, Python*

Sep. 2023 – Dec. 2023

- Built a full-stack social media platform and companion **mobile app** focused on curated photo galleries and milestone archiving, blending Instagram-style social interaction with VSCO-inspired gallery customization
- Implemented **Clerk** authentication and **UploadThing**-based media management, securely supporting **100+** test users and over **500+** uploaded media assets across web and mobile clients
- Engineered a responsive **TypeScript/MongoDB** architecture with optimized backend queries, REST APIs, and **TailwindCSS** UI components, improving page load performance by **30%**

## TECHNICAL SKILLS

**Languages:** JavaScript, Typescript, Java, Python, C/C++, C#, MongoDB, MySQL, VHDL, Assembly,

**Developer Tools:** Solidworks, AutoCAD, Simulink, PSpice, Matlab, ModelSim, VS Code, AWS, Git, Microsoft Azure

**Technologies:** React.js, React Native, Express.js, NodeJS, Flask, Firebase, Tailwind CSS, JavaFX

**SoftSkills:** Communication, Critical Thinking, Time Management, Adaptability, Team Player, Attention to Detail
